Features of the Matched Antibody Pair Kit

- Batch-to-batch consistency (Minimized lot variation): The pair kit is made using only recombinant monoclonal antibodies to ensure consistency between batches.
- Specificity: The specificity of the pair products has been verified through screening in complex samples such as plasma and serum.
- Sensitivity: Performance has been confirmed to be equal to or superior to competitors.

Components of the Matched Antibody Pair Kit

- Provides 5 x 96 test size for basic sandwich ELISA
- Includes capture and detector (biotinylated) antibody pair and protein standard
- For other reagents, the ELISA Accessory Pack (ab210905) is recommended

Try using the more cost-effective product, **Antibody Pair Kit®**

Abcam Matched Antibody Pair Kit consists of a capture antibody, a detection antibody, and a standard protein. You can purchase the ELISA accessory kit to create and use the ELISA kit yourself.
